

Registration form

**PIPE-FITTING CEU Training Course \$100.00
48 HOUR RUSH ORDER PROCESSING FEE ADDITIONAL \$50.00**

Start and Finish Dates: _____
You will have 90 days from this date in order to complete this course

List hours worked on assignment must match State Requirement. _____

Name _____ **Signature** _____
I have read and understood the disclaimer notice on page 2. Digitally sign XXX

Address _____

City _____ **State** _____ **Zip** _____

Email _____ **Fax (____)** _____

Phone:
Home (____) _____ **Work (____)** _____

Operator ID # _____ **Exp. Date** _____

Please circle/check which certification you are applying the course CEU's.
Water Treatment ___ Water Distribution ___ Other _____
Collections ___ Wastewater Treatment _____

**Technical Learning College TLC PO Box 3060, Chino Valley, AZ 86323
Toll Free (866) 557-1746 Fax (928) 272-0747 info@tlch2o.com**

If you've paid on the Internet, please write your Customer# _____

Please invoice me, my PO# _____

Please pay with your credit card on our website under Bookstore or Buy Now. Or call us and provide your credit card information.

We will stop mailing the certificate of completion so we need either your fax number or e-mail address. We will e-mail the certificate to you, if no e-mail address; we will fax it to you.

DISCLAIMER NOTICE

I understand that it is my responsibility to ensure that this CEU course is either approved or accepted in my State for CEU credit. I understand State laws and rules change on a frequent basis and I believe this course is currently accepted in my State for CEU or contact hour credit, if it is not, I will not hold Technical Learning College responsible. I fully understand that this type of study program deals with dangerous, changing conditions and various laws and that I will not hold Technical Learning College, Technical Learning Consultants, Inc. (TLC) liable in any fashion for any errors, omissions, advice, suggestions or neglect contained in this CEU education training course or for any violation or injury, death, neglect, damage or loss of your license or certification caused in any fashion by this CEU education training or course material suggestion or error or my lack of submitting paperwork. It is my responsibility to call or contact TLC if I need help or assistance and double-check to ensure my registration page and assignment has been received and graded. It is my responsibility to ensure all information is correct and to abide with all rules and regulations.

State Approval Listing Link, check to see if your State accepts or has pre-approved this course. Not all States are listed. Not all courses are listed. If the course is not accepted for CEU credit, we will give you the course free if you ask your State to accept it for credit.

Professional Engineers; Most states will accept our courses for credit but we do not officially list the States or Agencies. Please check your State for approval.

State Approval Listing URL...

<http://www.abctlc.com/downloads/PDF/CEU%20State%20Approvals.pdf>

You can obtain a printed version of the course manual from TLC for an additional \$169.95 plus shipping charges.

AFFIDAVIT OF EXAM COMPLETION

I affirm that I personally completed the entire text of the course. I also affirm that I completed the exam without assistance from any outside source. I understand that it is my responsibility to file or maintain my certificate of completion as required by the state or by the designation organization.

Grading Information

In order to maintain the integrity of our courses we do not distribute test scores, percentages or questions missed. Our exams are based upon pass/fail criteria with the benchmark for successful completion set at 70%. Once you pass the exam, your record will reflect a successful completion and a certificate will be issued to you.

For security purposes, please fax or e-mail a copy of your driver's license and always call us to confirm we've received your assignment and to confirm your identity.

CERTIFICATION OF COURSE PROCTOR

Technical Learning College requires that our students who takes a correspondence or home study program course must pass a proctored course reading, quiz and final examination. The proctor must complete and provide to the school a certification form approved by the commission for each examination administered by the proctor.

Instructions. When a student completes the course work, fill out the blanks in this section and provide the form to the proctor with the examination.

Name of Course: _____

Name of Licensee: _____

Instructions to Proctor. After an examination is administered, complete and return this certification and examination to the school in a sealed exam packet or in pdf format.

I certify that:

1. I am a disinterested third party in the administration of this examination. I am not related by blood, marriage or any other relationship to the licensee which would influence me from properly administering the examination.
2. The licensee showed me positive photo identification prior to completing the examination.
3. The enclosed examination was administered under my supervision on _____. The licensee received no assistance and had no access to books, notes or reference material.
4. I have not permitted the examination to be compromised, copied, or recorded in any way or by any method.
5. Provide an estimate of the amount of time the student took to complete the assignment.

Time to complete the entire course and final exam. _____

Notation of any problem or concerns:

Name and Telephone of Proctor (please print):

Signature of Proctor

Pipe-fitting Answer Key

Name _____

Phone# _____

You are solely responsible to ensure this course is accepted for credit by your State. Did you check with your State agency to ensure this course is accepted for credit?

**Method of Course acceptance confirmation. Please fill this section
No Refunds.**

Website ___ Telephone Call ___ Email ___ Spoke to _____

Did you receive the approval number, if applicable? _____

What is the course approval number, if applicable? _____

You can use Adobe Acrobat DC Program to complete the assignment.

Multiple Choice. Pick only one answer per question. Select answer according to text, exactly as in text. Circle, Mark off, underline or Bold the answer. A felt tipped pen works best.

Please write down any questions that cannot be found or has problems

Please circle, underline, bold or X only one correct answer

I understand that I am 100 percent responsible to ensure that TLC receives the Assignment and Registration Key and that it is accepted for credit by my State or Providence. I understand that TLC has a zero tolerance towards not following their rules, cheating or hostility towards staff or instructors. I need to complete the entire assignment for credit. There is no credit for partial assignment completion. My exam was proctored. I will contact TLC if I do not hear back from them within 2 days of assignment submission. I will forfeit my purchase costs and will not receive credit or a refund if I do not abide with TLC's rules. I will not hold TLC liable for any errors, injury, death or non-compliance with rules. I will abide with all federal and state rules and rules found on page 2.

Please Sign that you understand and will abide with TLC's Rules.

Signature

Please write down any questions you were not able to find the answers or that have errors.

This course contains general EPA's SDWA federal rule requirements. Please be aware that each state implements water / sampling procedures/safety/ environmental / building regulations that may be more stringent than EPA's regulations. Check with your state environmental/health agency for more information. These rules change frequently and are often difficult to interpret and follow. Be careful to not be in non-compliance and do not follow this course for proper compliance.

When Finished with Your Assignment...

REQUIRED DOCUMENTS

Please scan the **Registration Page, Answer Key, Proctoring report, Survey and Driver's License** and email these documents to info@TLCH2O.com.

IPhone Scanning Instructions

If you are unable to scan, take a photo of these documents with your **iPhone** and send these photos to TLC, info@TLCH2O.com.

FAX

If you are unable to scan and email, please fax these documents to TLC, if you fax, call to confirm that we received your paperwork. **(928) 468-0675**

Rush Grading Service

If you need this assignment graded and the results mailed to you within a 48-hour period, prepare to pay an additional rush service handling fee of \$50.00. This fee may not cover postage costs. If you need this service, simply write RUSH on the top of your Registration Form. We will place you in the front of the grading and processing line. Thank you...

Please e-mail or fax this survey along with your final exam

PLEASE COMPLETE THIS FORM BY CIRCLING THE NUMBER OF THE APPROPRIATE ANSWER IN THE AREA BELOW.

1. Please rate the difficulty of your course.
Very Easy 0 1 2 3 4 5 Very Difficult

2. Please rate the difficulty of the testing process.
Very Easy 0 1 2 3 4 5 Very Difficult

3. Please rate the subject matter on the exam to your actual field or work.
Very Similar 0 1 2 3 4 5 Very Different

4. How did you hear about this Course? _____

5. What would you do to improve the Course?

How about the price of the course?

Poor _____ Fair _____ Average _____ Good _____ Great _____

How was your customer service?

Poor _____ Fair _____ Average _____ Good _____ Great _____

Any other concerns or comments.

Pipefitting CEU Training Course Assignment

The Pipefitting CEU course assignment is available in Word on the Internet for your convenience, please visit www.ABCTLTC.com and download the assignment and e-mail it back to TLC.

You will have 90 days from receipt of this manual to complete it in order to receive your Professional Development Hours (PDHs) or Continuing Education Unit (CEU). A score of 70 % or better is necessary to pass this course. If you should need any assistance, please email all concerns and the completed ANSWER KEY to info@tlch2o.com.

Select one answer per question.

Hydraulic Principles

Hydraulics

1. Which of the following includes the manner in which liquids act in tanks and pipes, deals with their properties, and explores ways to take advantage of these properties?
A. Hydraulics C. Hydrostatics
B. Hydrokinetics D. None of the above
2. Which of the following includes the consideration of liquids at rest, involves problems of buoyancy and flotation?
A. Pressure C. Hydraulics
B. Hydrostatics D. None of the above
3. Hydraulics is applied commonly to the study of this missing term, other liquids, and even gases when the effects of compressibility are small.
A. Fluids C. Mechanical properties of water
B. Flow D. None of the above
4. Hydraulics can be divided into two areas, this term and hydrokinetics.
A. Fluids C. Mechanical properties of water
B. Hydrostatics D. None of the above
5. Hydraulics is a branch of engineering concerned mainly with moving liquids.
A. True B. False
6. Hydrostatics is based on the Greek word for water, and originally covered the study of the physical behavior of water at rest and in motion.
A. True B. False
7. Which of the following includes the behavior of all liquids, although it is primarily concerned with the motion of liquids?
A. Fluids C. Hydraulics
B. Hydrostatics D. None of the above
8. Which of the following includes the study of liquids in motion, is concerned with such matters as friction and turbulence generated in pipes by flowing liquids?
A. Hydrostatics C. Flow
B. Hydrokinetics D. None of the above

9. Which of the following is about the pressures exerted by a fluid at rest?
 A. Pressure C. Hydraulics
 B. Hydrostatics D. None of the above
10. Which of the following is an excellent example of deductive mathematical physics, and in which the predictions agree closely with experiment?
 A. Hydrostatics C. Flow
 B. Hydrokinetics D. None of the above
11. Which of the following is usually stated that a fluid is a substance that cannot resist a shearing stress, so that pressures are normal to confining surfaces?
 A. Hydrostatics C. Flow
 B. Hydrokinetics D. None of the above
12. Hydraulics may be the physical property that varies over the largest numerical range, competing with electrical resistivity.
 A. True B. False

Pressure

13. Water is incompressible, while air is very compressible.
 A. True B. False
14. A fluid is a substance that cannot exert any permanent forces tangential to a boundary and any force that it exerts on a boundary must be normal to the boundary.
 A. True B. False
15. Both air and water are considered to be?
 A. Absolute pressure C. Volume
 B. Fluid(s) D. None of the above
16. Which of the following does water possess and air does not?
 A. Absolute pressure C. Volume
 B. Shearing force D. None of the above
17. A force is proportional to the _____, and is called a pressure.
 A. Pascal's Principle C. Permanent forces tangential
 B. Area on which it is exerted D. None of the above

Water Pressure

18. Which of the following are very frequently stated in terms of the height of a fluid?
 A. Weight C. Depth
 B. Pressure(s) D. None of the above
19. Water with a pressure head of 10 ft can provide the same _____ as an equal amount of water raised by 10 ft.
 A. Weight C. Energy
 B. Pressure(s) D. None of the above

20. The weight of a cubic foot of water is 62.4 pounds per square foot. The base can be subdivided into 144-square inches with each subdivision being subjected to a pressure of 0.433 psig. This is one of our key foundation for backflow prevention.
A. True B. False

Pressure and Force

21. Water pressure determines the flow of water from the tap.
A. True B. False

22. Which of the following is the force that pushes water through pipes?
A. Pressure C. Shearing force
B. Fluid(s) D. None of the above

23. Which of the following and force are used extensively in the study of fluid power?
A. Absolute pressure C. Volume
B. Pressure D. None of the above

Volume and Velocity of Flow

24. Which of the following flow terms is passing a point in a given time is known as its volume of flow or flow rate?

- A. Pressure drop C. Velocity of flow
B. Volume of a liquid D. None of the above

25. Which of the following is usually expressed in gallons per minute (gpm) and is associated with relative pressures of the liquid, such as 5 gpm at 40 psi?

- A. Pressure drop C. Velocity of flow
B. Volume of flow D. None of the above

26. Which of the following is defined as the average speed at which the fluid moves past a given point. It is usually expressed in feet per second (fps) or feet per minute (fpm)?

- A. Pressure drop C. Velocity of flow
B. Volume of a liquid D. None of the above

27. Which of the following is an important consideration in sizing the hydraulic lines?

- A. Pressure drop C. Velocity of flow
B. Volume of a liquid D. None of the above

28. Volume and friction head are often considered together, that is, with volume of input unchanged—the velocity of flow increases as the cross section or size of the pipe decreases.

- A. True B. False

Backflow Chapter

What is backflow? Reverse flow condition

29. Backflow is the undesirable reversal of flow of nonpotable water or other substances through a _____ and into the piping of a public water system or consumer's potable water system.

- A. Cross-connection C. Indirect connection
B. Backsiphonage D. None of the above

30. Which of the following can occur when there is a stoppage of water supply due to nearby firefighting, a break in a water main?
- A. Backpressure C. Indirect connection
B. Backsiphonage D. None of the above
31. Which of the following is backflow caused by a downstream pressure that is greater than the upstream or supply pressure in a public water system or consumer's potable water system?
- A. Backpressure C. Indirect connection
B. Backsiphonage D. None of the above
32. Which of the following can result from an increase in downstream pressure, a reduction in the potable water supply pressure, or a combination of both?
- A. Backpressure C. Indirect connection
B. Backsiphonage D. None of the above
33. Which of the following is there two forms-backpressure and backsiphonage?
- A. Backflow C. Cross-connection
B. Indirect connection D. None of the above
34. The basic mechanism for preventing backflow is a mechanical _____, which provides a physical barrier to backflow.
- A. Air gap C. Method
B. Backflow preventer D. None of the above
35. The principal types of mechanical backflow preventer are the reduced-pressure principle assembly, the _____, and the double check valve assembly.
- A. Air gap C. Device or method
B. Vacuum breaker D. None of the above
36. Which of the following is any temporary or permanent connection between a public water system or consumer's potable water system and any source or system containing nonpotable water or other substances?
- A. Direct connection C. Cross-connection
B. Indirect connection D. None of the above
37. Which of the following is backflow caused by a negative pressure (i.e., a vacuum or partial vacuum) in a public water system or consumer's potable water system?
- A. Backpressure C. Indirect connection
B. Backsiphonage D. None of the above
38. Which of the following can occur whenever the amount of water being used exceeds the amount of water being supplied, such as during water line flushing, firefighting, or breaks in water mains?
- A. Backpressure C. Reduction
B. Backsiphonage D. None of the above
39. Which of the following is a means or mechanism to prevent backflow?
- A. Air break C. Method
B. Backflow preventer D. None of the above

40. Basic means of preventing backflow is an _____, which either eliminates a cross-connection or provides a barrier to backflow.
- A. Air gap
 - B. Indirect connection
 - C. Method
 - D. None of the above

Types of Backflow Prevention Methods and Assemblies

41. Which of the following must either be physically disconnected or have an approved backflow prevention device installed to protect the public water system?
- A. Cross-connection
 - B. Backsiphonage
 - C. Indirect connection
 - D. None of the above

42. When the air flow is restricted, such as the case of an air gap located near a wall, the _____ separation must be increased.
- A. Open receiving vessel
 - B. Air break
 - C. Air gap
 - D. None of the above

43. An air gap is a physical disconnection between the free flowing discharge end of a potable water pipeline and the top of an?
- A. Open receiving vessel
 - B. Air break
 - C. Air gap
 - D. None of the above

44. Which of the following must be at least two times the diameter of the supply pipe and not less than one inch?
- A. Barrier to backflow
 - B. Air break
 - C. Air gap
 - D. None of the above

45. According to the text, air gap separations must be vertically orientated a distance of at least twice the inside diameter of the supply, but never less than?
- A. 1 inch
 - B. 2 inches
 - C. 3 inches
 - D. None of the above

46. An obstruction around or near an _____ may restrict the flow of air into the outlet pipe and nullify the effectiveness of the air gap to prevent backsiphonage.
- A. High hazard installations
 - B. Air break
 - C. Air gap
 - D. None of the above

47. An air gap is acceptable for _____ and is theoretically the most effective protection.
- A. High hazard installations
 - B. High pollutional concerns
 - C. Low pollutional hazards
 - D. None of the above

48. The type of device selected for a particular installation depends on several factors.
- A. True
 - B. False

49. According to the text, an air break is a physical separation between the free flowing discharge end of a potable water supply pipeline, and the overflow rim of an open or non-pressure receiving vessel.
- A. True
 - B. False

Vacuum Breakers

50. Both vacuum breakers devices primary purpose is to protect the water system from cross connections due to submerged inlets, such as irrigation systems and tank applications.

- A. True B. False

51. The difference between the two types them is that the pressure vacuum breaker _is spring loaded to assist the device's opening.

- A. True B. False

52. Both vacuum breakers devices open the pipeline to atmosphere in the event of backsiphonage only.

- A. True B. False

53. Both vacuum breakers devices are approved for backpressure conditions.

- A. True B. False

54. The Atmospheric vacuum breaker allows air to enter the water line when the line pressure is reduced to a gauge pressure of zero or below.

- A. True B. False

55. Which of the following can have two types: atmospheric and pressure?

- A. High hazard installations C. Hazard application(s)
B. Vacuum breaker(s) D. None of the above

56. Both vacuum breakers devices are only suitable for?

- A. High hazard installations C. Low hazard conditions
B. High polluttional concerns D. None of the above

57. Which of the following may not be installed downstream of atmospheric vacuum breakers but are allowed on pressure vacuum breakers?

- A. Valve assembly C. Air inlet valve
B. Shut offs D. None of the above

58. The devices must be installed above the highest?

- A. Downstream piping C. Hazard applications
B. Mountain D. None of the above

59. Which of the following contains a float check, a check seat, and an air inlet port?

- A. Double check C. RP
B. Atmospheric vacuum breaker D. None of the above

60. Which of the following is not internally loaded?

- A. Air inlet valve C. Relief port
B. Check valve D. None of the above

Plumbing Fittings

Water Service Pipe Installation

61. Underground Water Service.

Water service pipe shall be installed outside the?

- A. Water service pipe
- B. Foundation wall
- C. Maximum frost penetration of the local area
- D. None of the above

62. Water service and building drain or building sewer may be installed in which of the following with a minimum of 10 feet horizontal separation?

- A. Same trench
- B. Separate trenches
- C. An underground potable water pipe
- D. None of the above

63. According to the text, the water service and the building drain or building sewer may be installed in the same trench provided that the water service is placed on which of the following a minimum of 18 inches above the building drain or building sewer?

- A. A solid shelf
- B. Same trench
- C. Beneath a sanitary sewer or drain
- D. None of the above

64. The minimum depth for any water service pipe shall be at least 36 inches or the maximum frost penetration of which of the following terms, whichever is of greater depth?

- A. Local area
- B. Center of the sanitary sewer
- C. Maximum frost penetration of the local area
- D. None of the above

65. No water service pipe shall be installed or permitted outside of a building or in which of the following unless provisions are made to protect such pipe from freezing?

- A. An exterior wall
- B. An underground potable water pipe
- C. Beneath a sanitary sewer or drain
- D. None of the above

66. Potable Water Piping and Sanitary Sewer Crossing Installation Requirements.

Where it is necessary for the potable water piping to pass above or below a sanitary sewer, such piping shall be installed with which of the following for a distance of 10 feet on either side from the center of the sanitary sewer?

- A. Water service pipe
- B. Foundation wall
- C. Minimum vertical separation of 18 inches
- D. None of the above

67. Where it is necessary for the potable water piping to pass beneath a _____, the sanitary sewer or drain shall be constructed of materials as specified in Approved Building Drainage/Vent Pipe for building drains, and shall extend on each side of the crossing to a distance of at least 10 feet as measured at right angles to the water line.

- A. An exterior wall
- B. Soil or waste lines
- C. Sanitary sewer or drain
- D. None of the above

Wet/Dry Bore:

68. When it is not possible to comply with subsection (b)(1) or (2), a pressure rated pipe approved for building drain material shall encase the water service pipe. Which of the following shall be sealed with a casing seal and extend 10 feet on either side of the center of the sanitary sewer pipe?

- A. Stop-and-waste valves
- B. Casing pipe
- C. Supply outlet
- D. None of the above

Stop-And-Waste Valve

69. Frost free hydrants and fire hydrants shall not be considered?

- A. Stop-and-waste valves
- B. Potability of the water
- C. Supply outlet
- D. None of the above

Potable Water Pumping and Storage Equipment

70. Potable water pumps, tanks, filters, and all other appliances and devices shall be protected against?

- A. Contamination
- B. Deep seal
- C. Outside atmosphere
- D. None of the above

Water Supply Tanks.

71. Which of the following shall be properly covered to prevent contamination of the water supply?

- A. Stop-and-waste valves
- B. Potable water supply tanks
- C. Supply outlet
- D. None of the above

Cleaning, Painting, Repairing Water Tanks.

72. A potable water supply tank used for which of the following shall not be lined, painted or repaired with any material which affects either the taste or the potability of the water?

- A. Domestic purposes
- B. Auxiliary pressure (booster) system
- C. The supply outlet
- D. None of the above

73. Tanks shall be disconnected from the system during such operations to prevent any which of the following from entering the system?

- A. Foreign substance
- B. No restrictions
- C. Auxiliary pressure systems
- D. None of the above

Potable Water Supply Tanks and Auxiliary Pressure Tanks

74. When the water pressure from the _____ is insufficient during periods of peak flow or due to the building height to supply all fixtures, the rate of supply shall be supplemented by a gravity tank or auxiliary pressure system?

- A. Public water supply main
- B. Potability of the water
- C. Supply outlet
- D. None of the above

75. Which of the following shall not substitute for adequate sizing of water distribution piping within the building?

- A. Vacuum relief valve
- B. No restrictions
- C. Auxiliary pressure systems
- D. None of the above

Tank Supply Inlet and Outlet.

76. Which of the following to the tank shall have a minimum air gap of at least six (6) inches?

- A. Water supply inlet
- B. Gravity tank(s)
- C. Supply outlet
- D. None of the above

Overflow For Water Supply Tanks.

77. Overflow pipes for which of the following shall be indirectly connected to the drainage system with an air gap of at least six (6) inches?

- A. Potability of the water
- B. Gravity tank(s)
- C. Auxiliary pressure (booster) system
- D. None of the above

78. Which of the following shall be full sized, unrestricted and screened with 24-mesh per inch stainless steel or bronze screen?

- A. Overflow pipes
- B. An air gap
- C. The supply outlet
- D. None of the above

Size of Overflow.

79. Overflow drains for gravity water supply tanks shall have an area of at least twice the size of which of the following terms?

- A. Restriction
- B. Air gap
- C. Supply pipe
- D. None of the above

Demand Load.

80. _____ or water distribution piping ("dead ends"), where the water in the piping may become stagnant, are prohibited. A developed length of more than 2 feet shall be considered a dead end.

- A. Peak demand
- B. An air chamber
- C. Unused sections of water service
- D. None of the above

Design of a Building Water Distribution System

81. Design and Installation. The design and installation of the hot and cold water building distribution systems shall provide a volume of water at the required rates and pressures to ensure the safe, efficient and satisfactory operation of fixtures, fittings, appliances and other connected devices during periods of?

- A. Water service demand load
- B. Peak use
- C. Discharge side of the water meter
- D. None of the above

82. No distribution pipe or pipes shall be installed or which of the following or in an exterior wall unless provisions are made to protect such pipe from freezing?

- A. Same trench
- B. Soil or waste lines
- C. Permitted outside of a building
- D. None of the above

Minimum Water Pressure.

83. The minimum constant water service pressure on which of the following shall be (at least) 20 p.s.i.?

- A. Air chamber(s)
- B. An auxiliary pressure system
- C. The discharge side of the water meter
- D. None of the above

Safety Devices

84. All equipment used for heating water or storing hot water shall be achieved by installing either a pressure relief valve and which of the following or by installing a combination pressure-temperature relief valve?

- A. Energy cut-off devices
- B. Temperature relief valve
- C. Temperature sensing element
- D. None of the above

Pressure and Temperature Relief Valves.

85. Which of the following shall have an ASME relief rating to meet the pressure conditions specified on the equipment served?

- A. Pressure relief valve(s)
- B. A check valve or shut-off valve
- C. Combination pressure-temperature relief valve
- D. None of the above

Temperature Relief Valves.

86. Temperature relief valves shall be installed so that the _____ is immersed in the hottest water within the top 6 inches of the tank.

- A. Pressure relief valve(s)
- B. Temperature sensing element
- C. Combination pressure-temperature relief valve
- D. None of the above

Combination Pressure-Temperature Relief Valves.

87. Combination pressure-temperature relief valves shall comply with the applicable requirements as listed in Appendix A, Table A for individual pressure and which of the following and shall be installed so that the temperature sensing element is immersed in the hottest water within the top 6 inches of the tank and have a test lever?

- A. Pressure relief valve(s)
- B. Individual temperature relief valves
- C. Combination pressure-temperature relief valve
- D. None of the above

Types of Joints

88. Caulked joints. Caulked joints for which of the following shall be firmly packed with oakum or hemp and filled with molten lead?

- A. Bore and all chips
- B. Cast iron hub-and-spigot pipe
- C. Oakum or hemp and filled with molten lead
- D. None of the above

89. Paint, varnish, or other coatings shall not be permitted on the jointing material until after a plumbing inspector has been given the opportunity to test and approve or disapprove the?

- A. Joint
- B. Caulking ferrule
- C. Properly soldered together
- D. None of the above

Threaded/Screwed Joints.

90. All burrs shall be removed; pipe ends shall be reamed or filed to size of the _____ shall be removed?

- A. Bore and all chips
- B. Cleaned bright
- C. Oakum
- D. None of the above

91. Which of the following shall be insoluble in water and non-toxic?

- A. A proper flaring tool
- B. Jointing material compound
- C. Pipe joints compound
- D. None of the above

92. Wiped Joints. Joints in lead pipe or fittings, or between lead pipe fittings and brass or copper pipe ferrules, solder nipples, or traps shall be?

- A. Full-wiped joints
- B. Caulked compound
- C. Filled with molten lead
- D. None of the above

93. Which of the following shall have exposed surface on each side of the joint at least 3/4" and at least as thick as the material being joined?

- A. A proper flare
- B. Wiped joints
- C. Properly soldered together
- D. None of the above

94. Wall or floor flange lead-wiped joints shall be made by using a lead ring or which of the following placed behind the joints at the wall or floor?

- A. Brass or copper
- B. Lead ring
- C. Flange
- D. None of the above

95. Which of the following between lead pipe and cast iron, steel or wrought iron shall be made by means of a caulking ferrule, soldering nipple, or bushing?

- A. Joints
- B. Jointing material
- C. Caulking ferrule
- D. None of the above

Soldered Joints.

96. The joints shall be which of the following and made with approved lead free solder?

- A. Properly fluxed
- B. Cleaned bright
- C. Brass or copper
- D. None of the above

97. Joints in copper water tubing shall be made with approved cast bronze or wrought copper pressure fittings?

- A. A proper flaring tool
- B. Caulking ferrule
- C. Properly soldered together
- D. None of the above

98. All solders or flux containing more than 0.2% lead shall bear a warning label which states that the solder or?

- A. Bore and all chips
- B. Flux
- C. Molten lead
- D. None of the above

Flared Joints.

99. Which of the following for plastic pipe and tubing and soft copper water tubing shall be made with approved fittings?

- A. Approved fitting(s)
- B. Flared joints
- C. Are prohibited
- D. None of the above

Hot-Poured Joints.

100. Hot-poured compound for clay or concrete sewer pipe shall not be which of the following and when poured against a dry surface?

- A. Dry surface
- B. Water absorbent
- C. Approved brazing filler metal
- D. None of the above

Precast Joints.

101. Which of the following is inserted in the collar, it shall bind before contacting the base of the socket?

- A. Approved fitting(s)
- B. Spigot end
- C. Female end
- D. None of the above

Brazed Joints.

102. Brazed joints shall be made by first cleaning the surface to be joined down to the base metal, applying which of the following for such joints and for the filler metal?

- A. Approved fitting(s)
- B. Brazing
- C. Flux approved
- D. None of the above

103. The joint shall be made with a mechanical extraction tool and joined by?

- A. Approved fitting(s)
- B. Brazing
- C. Flux approved
- D. None of the above

Cement Mortar Joints.

104. Except for repairs, cement mortar joints are?
A. Approved fitting(s) C. Prohibited
B. Accepted D. None of the above

Burned Lead (Welded).

105. (For drain, waste and vent system only) The thickness of which of the following shall be at least as thick as the lead being joined?
A. Weld C. Approved brazing filler metal
B. Flux approved D. None of the above

Bituminized Fiber Pipe Joints.

106. Joints in bituminized fiber pipe shall be made with which of the following of the same composition as the pipe?
A. Weld C. Tapered type couplings
B. Brazing D. None of the above

Plastic Pipe Joints

107. Every joint in plastic piping shall be made with approved fittings by either solvent welded or fusion welded connections, compression fittings, approved insert fittings, metal clamps and screws of corrosion resistant material, or?
A. Adaptor fittings C. Threaded joints
B. Compression fittings D. None of the above

Joints and Fittings in Plastic Pipe.

108. Which of the following and joints shall be in accordance with the manufacturer's recommendations?
A. Potable water piping fittings C. Threaded or flanged joints
B. Slip joints D. None of the above

109. Polyethylene (PE) pipe shall be installed only with compression fittings, insert and clamp type fittings or?
A. Compression fittings C. Thermal welded joints and fittings
B. Solvent welded D. None of the above

110. Which of the following shall be of corrosion resistant material, the inside diameter of any insert fitting shall not be less than the minimum allowable size for water service/distribution piping?
A. Clamps C. Ground joint connections
B. Slip joints D. None of the above

111. Polyvinyl chloride (PVC) pipe shall be installed with which of the following joints only?
A. Adaptor fittings C. Solvent welded or flanged
B. Solvent welded D. None of the above

112. The primer and solvent cement used shall be in accordance with the manufacturer's recommendation for?
A. Polyvinyl chloride piping C. Ground joint connections
B. Fittings and joints D. None of the above

113. Polybutylene (PB) pipe shall be installed only with insert and clamp type fittings, compression type, flanged type, or?

- A. Compression fittings
- B. Solvent welded
- C. Thermal welded joints and fittings
- D. None of the above

Joints in Plastic Drainage.

114. Which of the following in plastic drainage piping or vent piping within a building shall be solvent welded?

- A. Joints
- B. Slip joints
- C. Ground joint connections
- D. None of the above

115. The solvent cement shall be specific for the type of piping material, which of the following are acceptable if accessible?

- A. Compression fittings
- B. Solvent welded
- C. O-ring expansion joints
- D. None of the above

Ground Joint Connections.

116. Which of the following shall not be used in any inaccessible drainage piping?

- A. Clamps
- B. Fittings and joints
- C. Ground joint connections
- D. None of the above

No-Hub Soil Pipe Joints.

117. Shielded joints for no-hub cast iron soil pipe shall be made with an elastomeric gasket covered by either a stainless steel shield secured by 2 or more stainless steel bands or clamps, or covered by which of the following secured with stainless steel nuts and bolts?

- A. Compression fittings
- B. Solvent welded
- C. Cast iron couplings
- D. None of the above

Compression Type Joints.

118. The pipe shall comply with the specifications contained in ASTM A-74 with regard to which of the following dimensions and tolerances?

- A. Hub and spigot
- B. Slip joints
- C. Ground joint connections
- D. None of the above

119. Which of the following for copper water tube or brass tube shall be made with brass ferrules and ground joint connections?

- A. Compression type joints
- B. Slip joints
- C. Ground joint connections
- D. None of the above

Special Joints

120. Copper Tubing to Screwed Pipe Joints. Which of the following from copper tubing to threaded pipe shall be made by the use of a cast bronze or wrought copper adaptor fitting?

- A. Joints
- B. Threaded or flanged joints
- C. Ground joint connections
- D. None of the above

Slip Joints.

121. In drainage and water piping, which of the following may be used on the inlet side of the trap or in the trap seal, and on the exposed fixture supply?

- A. Fittings and joints
- B. Slip joints
- C. Threaded or flanged joints
- D. None of the above

122. Which of the following shall not be used in any inaccessible piping?

- A. Clamps
- B. Slip joints
- C. Ground joint connections
- D. None of the above

123. Which of the following are permitted, provided they meet the following specifications: they are installed by being pushed onto copper or CPVC?

- A. Push-on angle stop valves
- B. Stainless steel bands
- C. Compression type couplings
- D. None of the above

124. Which of the following material shall conform to the type piping on which it is installed?

- A. The expansion joint
- B. Stainless steel bands
- C. Grooved type mechanical couplings
- D. None of the above

125. Which of the following shall not be used in unexposed water piping except for water services, water meter yokes and stop box connections?

- A. The expansion joint
- B. Stainless steel bands
- C. Compression type couplings
- D. None of the above

Grooved Type Mechanical Couplings.

126. Which of the following terms, may be used in potable water and roof drain piping, such couplings shall not be used in waste, soil or vent piping?

- A. The expansion joint
- B. Compression type couplings
- C. Grooved type mechanical couplings
- D. None of the above

Use of Joints

127. Clay Sewer Pipe. Joints in vitrified clay pipe or between such pipe and metal pipe shall be made with a neoprene gasket and?

- A. Proper adaptor fittings
- B. Stainless steel bands
- C. Neoprene gasket and stainless steel bands
- D. None of the above

128. Concrete Sewer Pipe. Joints in concrete sewer pipe or between such pipe and metal pipe shall be made with which of the following and stainless steel bands?

- A. Wiped joints
- B. Unions
- C. Neoprene gasket
- D. None of the above

Screw Pipe to Cast Iron.

129. Which of the following between wrought iron, steel, brass, or copper pipe, and cast iron pipe shall be either caulked or threaded joints?

- A. Proper adaptor fittings
- B. Appropriate type adaptor
- C. Joints
- D. None of the above

Lead to Cast Iron, Wrought Iron or Steel.

130. Which of the following between lead and cast iron, wrought iron, or steel pipe shall be made by means of wiped joints to a caulking ferrule, soldering nipple, or brushing?

- A. Wiped joints
- B. Unions
- C. Joints
- D. None of the above

Copper Water Tube.

131. Which of the following in copper tubing shall be made with cast bronze or wrought copper pressure fittings, properly soldered or brazed, or by means of compression or flared joints?

- A. Flared joints
- B. Appropriate type adaptor
- C. Joints
- D. None of the above

132. Which of the following and compression fittings shall not be installed underground except for water services, water meter yokes and stop box connections?

- A. Flared joints
- B. Unions
- C. Stainless steel bands
- D. None of the above

Plastic Pipe.

133. Joints between plastic pipe and which of the following shall be made only with an appropriate type adaptor?

- A. Flared joints
- B. Appropriate type adaptor
- C. Non-plastic material
- D. None of the above

Plastic-Commingling.

134. There shall be no commingling of which of the following within the same plumbing system except through the use of proper adaptors?

- A. Proper adaptors
- B. Stainless steel bands
- C. Plastic materials
- D. None of the above

135. Plastic pipe shall not be installed in which of the following or chase that contains uninsulated hot water?

- A. Proper adaptor fittings
- B. Plastic pipe
- C. Any tunnel
- D. None of the above

Unions

136. Which of the following may be used in the drainage and venting system when accessibly located above ground?

- A. Proper adaptors
- B. Unions
- C. Stop box connections
- D. None of the above

137. Which of the following shall be installed in a water supply system within 5 feet of regulating equipment, water heaters, water conditioning tanks, water conditioning equipment, pumps?

- A. Wiped joints
- B. Unions
- C. Stainless steel bands
- D. None of the above

Drainage System.

138. Unions may be used in the trap seal and on the inlet and outlet side of the trap. Unions shall have metal to metal seats except that which of the following may have plastic to plastic seats?

- A. Proper adaptors
- B. Unions
- C. Plastic unions
- D. None of the above

Water Supply System.

139. Unions in the water supply system shall be metal to metal with ground seats, except that plastic to metal unions may utilize durable, non-toxic, impervious?

- A. Proper adaptors
- B. Gaskets
- C. Stainless steel bands
- D. None of the above

140. Unions between copper pipe/tubing and dissimilar metals shall either be made with a brass converter fitting or be?

- A. Proper adaptors
- B. A dielectric type union
- C. Metal to metal with ground seats
- D. None of the above

Water Distribution System Chapter System Elements

141. Distribution mains function is to carry water from the water source or treatment works to users, these are the pipelines that make up the?

- A. Distribution system
- B. Complete gridiron system
- C. Distribution tree
- D. None of the above

142. Arterial main are interconnected with smaller distribution mains to form a complete gridiron system and are mains for?

- A. Tree system
- B. Complete gridiron system
- C. Distribution mains of large size
- D. None of the above

143. Storage reservoirs are structures used to store water and _____ the supply or pressure in the distribution system.

- A. Increase water pressure
- B. Equalize
- C. Main line isolation
- D. None of the above

144. Booster stations are used to _____ from storage tanks for low-pressure mains.

- A. Increase water pressure
- B. Equalize
- C. Boost flow
- D. None of the above

Gate Valves

145. In the distribution system, gate valves are used when a straight-line flow of fluid and?

- A. Maximum flow restriction
- B. Dependability
- C. Minimum flow restriction
- D. None of the above

146. In the distribution system, or on a residential job, gate valves are so-named because the part that either _____ flow through the valve acts somewhat like a gate.

- A. Fully drawn up
- B. Stops or allows
- C. Maximum flow restriction
- D. None of the above

147. If the valve is wide open, the gate is _____ into the valve bonnet.

- A. Fully drawn up
- B. Repair or replacement
- C. Minimum flow restriction
- D. None of the above

148. There is little pressure drop or flow restriction through the valve. Gate valves are not suitable for?

- A. Copper lines
- B. Dependability
- C. Throttling purposes
- D. None of the above

149. The control of flow is easy because of the valve's design, and the flow of fluid
A. True B. False

Ball Valves

150. Most ball valves require only a 180-degree turn to either completely open or close the valve.

A. True B. False

151. According to the text, some ball valves are operated by planetary gears.

A. True B. False

152. Ball valves should be either fully-on or fully-off, some ball valves also contain a swing check located within the ball to give the valve a check valve feature.

A. True B. False

Valve Exercising

153. Valve exercising should be done to locate inoperable due to freezing or build-up of rust or corrosion and done once per year to detect _____ and to prevent valves from becoming

A. Malfunctioning valves C. Minimum flow restriction
B. Repair or replacement D. None of the above

154. A valve inspection should include drawing valve location maps to show distances to the _____ from specific reference.

A. Valve(s) C. House
B. Monument D. None of the above

155. Service connections are used to _____ or other plumbing systems to the distribution system mains.

A. Connect individual buildings C. Decreases in size
B. By laying out D. None of the above

If Excessive Torque is Needed to Work the Valve

156. One cause of a valve failing to open are variations in the temperature and/or pressure of the?

A. High pressure side C. Valve sealing surfaces
B. Working fluid D. None of the above

System Layouts

Tree System

157. Newer water systems are frequently expanded with planning and developed into a tree-like system.

A. True B. False

158. The Tree system consists of a single main that _____ as it leaves the source and progresses through the area originally served.

A. Be isolated C. Limits the expansion
B. Decreases in size D. None of the above

159. Smaller pipelines _____ the main and divide again, much like the trunk and branches of a tree.

- A. Branch off
- B. Are manifolded to
- C. Limit the expansion
- D. None of the above

160. According to the text, there are several advantages gained by laying out water mains in a loop or grid, with feeder and distributor mains interconnecting at roadway intersections and other regular intervals.

- A. True
- B. False

Friction Loss

161. The damaged section can be isolated and the remainder of the system will still carry pressure, water will not be distributed if a single section fails.

- A. True
- B. False

162. During periods of peak fire flow demand, there will be less impact from _____ in water mains as the velocity within any given section of main.

- A. Friction loss
- B. Pressure
- C. Total pressure
- D. None of the above

Types of Pipes Used in the Water Distribution Field

Plastic Pipe (PVC)

163. Plastic pipe has seen extensive use available in different lengths and sizes; it is lighter than steel or copper and requires no special tools to install.

- A. True
- B. False

164. Plastic pipe has complete resistance to corrosion; and, in addition, it can be installed aboveground or below ground, has several advantages over metal pipe: it is flexible; it has superior resistance to?

- A. Ease of installation
- B. Chemical resistance
- C. Rupture from freezing
- D. None of the above

165. PVC pipes are made of tough, strong thermoplastic material that has _____ of physical and chemical properties.

- A. An excellent combination
- B. Chemical resistance
- C. Complete resistance to corrosion
- D. None of the above

166. PVC's chemical resistance and _____ make it an excellent material for application in various mechanical systems.

- A. Ease of installation
- B. Greater resistance
- C. Design strength
- D. None of the above

167. According to the text, often polyvinyl chloride is further chlorinated to obtain a stiffer design, a higher level of impact resistance, and a _____ to extremes of temperature.

- A. Ease of installation
- B. Greater resistance
- C. Design strength
- D. None of the above

168. A CPVC pipe can be used only in cold-water systems with temperatures up to 110°F.

- A. True
- B. False

169. Which of the following and economy makes plastic pipe popular for use in either water distribution and supply systems or sewer drainage systems?

- A. Ease of installation
- B. Working pressure
- C. Stamped on the outside
- D. None of the above

170. You will want to date and collect coupons or tap cut-outs to determine the condition of the pipe or?

- A. Ease of installation
- B. Measure the corrosion
- C. Measure the shock load
- D. None of the above

Plastic Pipe (PVC)

171. A main advantage of PVC piping is its light weight, allowing for?

- A. Easy installation
- B. Determine the C Factor
- C. Measure the shock load
- D. None of the above

172. The National Sanitation Foundation currently lists most brands of PVC pipe as being acceptable for potable water use, this information should be stamped on the outside of the pipe, along with _____ and temperature, diameter and pipe manufacturer.

- A. Ease of installation
- B. Working pressure
- C. Date and time
- D. None of the above

173. PVC pipe will have the highest C Factor of all the above pipes, the higher the C factor the?

- A. Long life
- B. Rougher the interior
- C. Smoother the pipe
- D. None of the above

174. Since PVC is non-metallic, a tracer wire must be installed with the PVC water main so that it can be located after burial.

- A. True
- B. False

Cast Iron (CIP)

175. CIP can be found in diameters from 3" to 48".

- A. True
- B. False

176. Advantages of CIP are its long life, ability to withstand shock loads and to withstand working pressures up to 120 psi.

- A. True
- B. False

Ductile Iron Pipe (DIP)

177. DIP can be purchased in 4" to 45" diameters and lengths of 18' to 20'.

- A. True
- B. False

178. DIP was developed to _____ associated with cast iron pipe.

- A. Overcome the breakage problems
- B. Withstand shock loads
- C. Provide a High C Factor
- D. None of the above

179. DIP's main advantage is that it is _____ by internal or external pressures.

- A. Withstand shock loads
- B. Extend the life
- C. Nearly indestructible
- D. None of the above

180. It is sometimes protected from highly corrosive soils by wrapping the pipe in plastic sheeting prior to installation, this practice can greatly _____ of this type of pipe.

- A. Withstand shock loads
- B. Extend the life
- C. Be nearly indestructible
- D. None of the above

Steel Pipe

181. Steel pipe is usually galvanized or dipped in coal-tar enamel and wrapped with coal-tar impregnated felt to reduce?

- A. Corrosion problems
- B. Bending
- C. Good yielding
- D. None of the above

182. Steel pipe is available in various diameters and in 20' or 21' lengths, its main advantage is the ability to form it into a variety of shapes.

- A. True
- B. False

183. Steel pipe's advantage is that it is able withstand corrosion by both soil and water.

- A. True
- B. False

184. From a health standpoint coal-tar products are undergoing scrutiny and it is recommended that the appropriate regulatory agencies be contacted prior to use of this material.

- A. True
- B. False

Asbestos Cement Pipe (ACP)

185. ACP is available in diameters from 3" to 36" and in 13' lengths.

- A. True
- B. False

186. ACP main advantages are its ability to _____ and its excellent hydraulic flow characteristics due to its smoothness.

- A. Withstand corrosion
- B. Lower C factor
- C. Transfer less friction
- D. None of the above

187. ACP main disadvantage is that it is _____ during construction or by shock loading.

- A. Lower C factor
- B. Unable to withstand corrosion
- C. Brittle and is easily broken
- D. None of the above

188. According to the text, ACP has some concern regarding the possible release of asbestos fibers in corrosive water and there has much debate over the health effects of ingested asbestos.

- A. True
- B. False

189. Precautionary measures must be taken to protect water utility workers when cutting, tapping or otherwise handling this type of pipe.

- A. True
- B. False

Galvanized Pipe

190. Galvanized pipe is commonly used for the water distributing pipes inside a building to supply hot and cold water to?

- A. The fixtures
- B. Water distributing pipes
- C. To copper fittings
- D. None of the above

191. Galvanized pipe is manufactured in 21-ft lengths and is coated with zinc the outside only.
A. True B. False

192. Pipe sizes are based on nominal inside diameters, these diameters vary with the thickness of the pipe.
A. True B. False

193. According to the text, outside pipe diameters remain constant so that pipe can be?
A. Soldered to copper fittings C. Threaded for standard fittings
B. Flanged D. None of the above

Copper

194. According to the text, copper is one of the least widely used materials for tubing, this is because it does not rust and is highly resistant to any bending.
A. True B. False

195. K pipe has the thickest walls.
A. True B. False

196. Copper pipe M has the thinnest walls.
A. True B. False

197. Soldering allows all the tubing and fittings to be set in place before the joints are finished.
A. True B. False

198. Hard temper tubing is available in 40- or 60-ft coils, while soft tubing comes in 12- and 20-ft straight lengths.
